Welcome to Big Video Converter

 Convert Video Formats

MP4, MKV, AVI, WebM and many more with hardware acceleration support

 Trim and Cut Videos

Select specific segments to keep and create new videos with only those parts

 Video Color Adjustments

Control brightness, saturation, and hue to enhance your videos

 Fast Copy Mode

Change container format without re-encoding for ultra-fast processing with no quality loss

 Crop Videos

Remove unwanted areas from edges to focus on what matters

 Audio Control

Extract, copy, or re-encode audio with multiple codec options

 Subtitle Management

Extract subtitles to SRT files or keep them embedded in video

 Batch Processing

Convert multiple videos at once with queue management

Show dialog on startup

Archive (AV1 + Opus)

⋮

AV1 MKV Bundled

High-quality AV1 with Opus audio in MKV. The slowest option here and the smallest files; meant for keeping, not for sharing.

#archive #av1 #opus #mkv #small

DaVinci Resolve (ProRes)

⋮

ProRes MOV Bundled

ProRes 422 Standard in MOV with the audio copied. Imports into DaVinci Resolve on Linux without transcoding; large files.

#davinci #resolve #editing #prores #intermediate

Instagram Reels

⋮

H.264 1080x1920 MP4 Bundled

Vertical 1080x1920 at 30 fps, H.264 with AAC stereo 128 kbps in MP4. Also right for Stories and TikTok.

#instagram #reels #stories #tiktok #vertical #social

WhatsApp

⋮

H.264 1280x720 MP4 Bundled

720p H.264 with light AAC audio in MP4: small enough to send in chat, plays on any phone.

#whatsapp #telegram #chat #small #720p

X / Twitter

⋮

H.264 1280x720 MP4 Bundled

720p at 30 fps in H.264 with AAC stereo, MP4. Sized for X's upload limits.

#x #twitter #720p #social

YouTube 1080p

⋮

H.264 1920x1080 MP4 Bundled

H.264 High profile with YouTube's recommended GOP and B-frame settings, AAC stereo 48 kHz, MP4 ready for upload.

#youtube #upload #1080p #social

YouTube 4K (H.265)

⋮

H.265 3840x2160 MP4 Bundled

Ready-made recipes: YouTube, Instagram, Facebook

Audio

Configure how the audio track will be handled. Copying keeps the original quality. Re-encoding allows changes.

Re-encode

Copy

Remove

Audio Handling

Choose what to do with the audio track. 'Copy' keeps the original. 'Re-encode' allows changing codec, bitrate and applying audio cleaning.

Copy without changes (fastest)

▼

AAC

Opus

Vorbis

Audio Codec

The format used to compress audio. AAC is widely compatible. Opus offers better quality at lower bitrates. Choose 'Copy' in audio handling to keep the original codec.

AAC (recommended)

▼

192k

64k

320k

Audio Bitrate

Higher bitrate means better audio quality but larger files. 192k is a good balance for most content.

Default

▼

Audio Channels

'Default' keeps the original channel count from the source video. Stereo (2) is standard. Mono (1) for voice only. 5.1 (6) for surround sound.

Default

Conversion recipe

What should the result be like?
Choose a simple goal. You can refine audio, subtitles and advanced options below.

Choose a result
Start with the outcome, not codec terminology.

- ☐ Fast Copy
No re-encoding, fastest
- ☒ Universal
H.264, compatible with all devices Recommended
- ☐ More Efficient
H.265, better compression
- ☐ Smaller File
AV1, best compression
- ☐ Customize encoding...
MP4
- ☐ Presets

What should the result be like?

Choose a simple goal. You can refine with advanced options below.

Choose a result

Start with the outcome, not codec details.

☐

Fast Copy

No re-encoding, fastest

☒

Universal

H.264, compatible with all devices

☐

More Efficient

H.265, better compression

☐

Smaller File

AV1, best compression

☐

Customize encoding...

MP4

☐

Presets

Ready-made recipes: YouTube, Instagram, etc.

Audio

✕

Configure how the audio track will be handled. Copying keeps the original quality. Re-encoding allows changes.

Re-encode

Copy

Remove

Audio Handling
Choose what to do with the audio track. 'Copy' keeps the original. 'Re-encode' allows changing codec, bitrate and applying audio cleaning.

Copy without changes (fastest) ▼

AAC

Opus

MP3

Audio Codec
The format used to compress audio. AAC is widely compatible. Opus offers better quality at lower bitrates. Choose 'Copy' in audio handling to keep the original codec.

AAC (recommended) ▼

180

64

128

192k

Audio Bitrate
Higher bitrate means better audio quality but larger files. 192k is a good balance for most content.

Default ▼

1

2

5.1

7.1

Audio Channels
'Default' keeps the original channel count from the source video. Stereo (2) is standard. Mono (1) for voice only. 5.1 (6) for surround sound.

Default ▼

CONVERSION QUEUE

Prepare every video with confidence

Use one simple recipe for the whole queue, then customize only the videos that need a different profile or resolution.

Subtitles

✕

Configure how subtitles are handled during conversion.

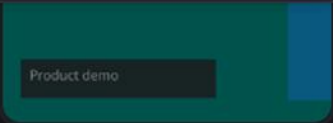

Subtitle Handling
Choose how subtitles are included in the output. 'Embedded' keeps them inside the video file. 'Extract to .srt' creates separate subtitle files.

Keep inside the video ▼

Only Extract Subtitles
Skip video conversion entirely and only extract the subtitle tracks to .srt files.

Extra

✕

Additional options for advanced users. The defaults work well for most cases.

Additional FFmpeg Options

Custom flags passed directly to FFmpeg. Example: '-ss 60 -t 30' to convert only 30 seconds starting at 1 minute.

Video Preview Rendering

How the video editor preview is rendered. 'Automatic' works best for most systems. Try 'Software' if you see display issues. Requires restart.

Automatic ▼

Export / Import Profile

Save your current conversion settings to a file or load settings from a previously exported profile.
